Rates of depression and anxiety are high among Muslim women. This study sought to compare depression rates of Muslim women in East London with those of non-Muslim women in England and with Muslim men in East London. We also sought to compare rate of health service use among Muslim women in East London, compared to non-Muslim women in England. We obtained the data to investigate these questions for the first time from 200 Muslim women in East London and from 46,040 women in England. From the Muslim women, Muslim men completed
